CULTURALLY RESPONSIVE PRACTICES

The Edgewood College value of Justice is demonstrated in courses that are designed to challenge, explore and foster the development of culturally-responsive teaching practices to educate students in diverse middle and secondary schools. Culturally responsive teaching connects students' cultural knowledge, prior experiences, and performance styles to academic knowledge and intellectual tools in ways that legitimize what students already know. Teachers who complete the Accelerated Secondary Program (ASP) become individuals who transcend their own cultural biases and preferences to establish and develop patterns for learning and communicating that engage and sustain student participation and achievement.

I came into the Accelerated Secondary Program with a strong desire to teach. The outstanding faculty at Edgewood College was able to take that raw passion for teaching and make me a competent professional in the classroom. Before I had even finished the program, I had been offered and accepted a job at an area high school that is the perfect fit for me. I know that I owe a great deal of credit for landing this position to the outstanding faculty of Edgewood College, as well as to my classmates in ASP, who have helped me to learn so much about teaching and about myself over the last 16 months.
