BUSINESS MANAGEMENT

ACCOUNTING

The School of Business at Edgewood College, internationally accredited by ACBSP, has a long history and a proud tradition of teaching business principles through the lens of ethical leadership and the Dominican values. Our programs evolve to reflect the dynamic world around us. Our professors will guide you through a broad range of courses relevant to future demands for entrepreneurship, sustainability, global perspectives, and technical knowledge.

Our integrated program design creates opportunities for you to gain practical business experience across multiple functional areas simultaneously. Rather than taking courses in an assembly line format (one subject at a time), you will engage in cross-functional learning circles taught by a team of faculty. This design also helps to better prepare you to take what you learn and apply it to real-world situations.

Within our intimate, caring environment, you can become a lifelong learner and exceptional, ethical leader creating a sustainable local and global economy. Our primary goals are to help students become socially responsible leaders and successful citizens of the world, graduating as expert problem-solvers, and critical, creative, and systems thinkers. We support students in achieving this with:

- Quality, personalized instruction
- A collaborative learning community
- Connections to local and global businesses

CAREER DEVELOPMENT

The Career Development Program at the School of Business is embedded in the core curriculum. Throughout the program, you will engage in key career development activities, including informational interviews, job shadowing, team-based internships, and individual internships. You can intern in a variety of roles and settings, including personal finance, banking, public and private accounting, insurance, healthcare, marketing, advertising, professional sports, retail sales, social service, and politics. You will participate in a variety of class projects and interact with business professionals in nonprofit, corporate, and global settings. We believe students need to be prepared to hit the ground running when they graduate.

GET INVOLVED

Our business student organizations – the Accounting Club, the Entrepreneurship Club, and Rotaract – offers you opportunities to extend classroom learning, engage in community outreach, and build connections with fellow students and the local business community.

INCREASE YOUR IMPACT

Continue your studies with an MBA or MS-Accountancy. These programs are designed for working professionals with evening, weekend, and online classes offered year-round.

SAMPLE COURSES

In addition to the integrated core curriculum, students choose among a variety of concentration courses while in the program.

Bus 340: Management of Organizations

Designed to give the student a thorough understanding of how organizations, as social and goal-directed entities, perform in a dynamic environment. In addition, special emphasis is placed on the role of management in successfully managing organizations to meet a variety of stakeholder goals.

Bus 380: Intermediate Accounting I

This course is an in-depth study of the theoretical foundations of financial accounting and reporting at the intermediate level. Topics include the accounting conceptual framework, the accounting information system, advanced financial statement preparation (balance sheet, income statement, and statement of cash flows), time value of money concepts, accounting for cash, receivables, inventories, property, plant, and equipment, and intangible assets.
