

HENRY PREDOLIN

# School of Nursing

EDGEWOOD COLLEGE • 1000 EDGEWOOD COLLEGE DR \* MADISON, WI • EDGEWOOD.EDU

## MAJORS

BACHELOR'S OF  
SCIENCE IN NURSING

The undergraduate Nursing program offers an opportunity to learn and grow in an atmosphere that upholds our Dominican values and promotes professional development.

Our small class sizes allow for engaging teaching styles that promote active student learning. The Henry Predolin School of Nursing partners with over 60 community agencies in and around Dane county for clinical placements including UW Hospital and Clinics, The American Family Children's Hospital, Meriter Hospital, St. Mary's Hospital, and the William S. Middleton Veteran's Administration Hospital. In addition to clinical placements, you will utilize the state-of-the-art simulation lab at the Center for Healthcare Education and Simulation. Edgewood College is also home to a 3D Anatomage table.

As a nursing student, you will receive close direct clinical supervision by faculty in the Henry Predolin School of Nursing. We are proud to maintain one of the lowest student/teacher ratios in the state at 7:1. Our five semester nursing curriculum includes exposure to the wide range of nursing roles and clinical experiences including maternal/child nursing, pediatrics, mental health, and public health nursing, in addition to acute care nursing.

## CENTER FOR HEALTHCARE EDUCATION AND SIMULATION

The Center for Healthcare Education and Simulation provides innovative education and training through the utilization of patient simulators and a realistic staged patient setting. Patient simulators include high-fidelity mannequins such as adult SimMan 3G, child Pedia Sim, birthing mother Noelle, newborn baby SimNewB, as well as several low-fidelity mannequins and task trainers. Three real-like and fully equipped patient rooms, each viewable from

a control room with one-way glass and closed-circuit monitors allow instructors to supervise scenarios. In-lab cameras record scenarios for students and instructors to view at a later time in order to facilitate reflective learning. Simulation experiences expose students to clinical scenarios in preparation for real clinical interactions, thus allowing students to safely practice team-based care and hone individual skills. The center was created out of a unique collaboration among Edgewood College, Meriter Health Services, and St. Mary's Hospital.
